

FUTURE FINE FURNITURE

PRODUCT INFORMATION

1. Frames are made from kiln dried hardwood lumber.
2. All frames are constructed under our strict supervision. Frames are all double dowelled, glued, and screwed and corner blocked. Sofa frames are all solid leg construction.
3. Show wood is made from hard maple and imported Italian beech. Furniture wood is finished with a 10 step procedure, selecting high grade wood, hand wiped stain to the final 2 coats of lacquer.
4. Seating comfort is achieved by starting from the non-visible area to the consumer. Frames are sprung with no less than 8 gauge fatigue tested No sag springs. There are 17 springs in a sofa, 12 in a love seat and 5 in a chair. Decks are upholstered with white bonded sisal pads and two layers of felt padding.
5. Seat cushion inserts are either bio plush or Qualux foam up to 2.6lb and wrapped in polyester fibres up to 1.8oz. We use feather seating in some styles.
6. Backs are sprung with the 11 gauge springs for the long lasting support and comfort, insulated with Tytar lining. Camel backs are upholstered with a layer of felt and 3 inch solid foam wrapped in polyester fiber. Semi-attached backs have a Dacron cushion insert.
7. Most sofas and loveseats come with two (2) toss cushions and arm cover. All styles come with covered decks.
8. Future Chair Ltd. works in the tradition bench work upholstery. Each piece is hand crafted by a highly trained upholster.
9. Products are carefully inspected for any defects before it is passed on to our shipping department.
10. Along with organic fabrics and sustainable wood products, Future Chair Ltd. now uses Bio Plush foam made from natural vegetable oils.

HANDCRAFTED QUALITY INSIDE AND OUT

- 
- A** All edges are sanded and padded with foam.
- B** All outside arms are lined and padded with foam.
- C** All critical joints are double dowelled, glued and screwed with corner blocks to ensure stability and durability.
- D** Extra Helical springs are placed along the front edge to prevent sagging.
- E** 8 gauge seating springs are placed 2 1/2" inches apart, accompanied with 3 wires for a firm, yet comfortable seating.
- F** Our decks are upholstered with white bonded sisal pad and two layers of felt padding.
- G** The skirts are pella innerlined for a straight and even hang.
- H** 7 / 8" polyester fiber wrap.
- I** All solid leg construction.
- J** Accent toss cushion available.
- K** Seat cushion inserts are made of high density 2.6 lbs BioPlush foam wrapped in 7 / 8" polyester fiber.
- L** Stabilizing cross-wires to eliminate spring separation.
- M** Firm back supports are glued and stapled to ensure durability, stability and frame trueness.
- N** 11 gauge sinuous wire back springs spaced 2 1/2" apart with cross-wire.
